

Steps to a Hydrogen Economy in California: A Clean, Secure Energy Future

Hosted by CA Air Resources Board, California Energy Commission and
Governor's Office of Planning and Research

CaFCP Headquarters
3300 Industrial Blvd.
W. Sacramento, CA

March 24, 2003

Agenda

Purpose: Create a common vision for the energy future in California and assess the State's readiness, abilities and willingness to move forward

9:30 Registration

10:00 Welcome— remarks by Alan Lloyd, ARB

10:10 Meeting Overview—remarks by Woody Clark, OPR

10:20 Comments from David Freeman, California Power Authority

10:30 Why should California become a hydrogen-based economy?
—Presentation by Jim Boyd, CEC

Facilitated discussions

Step 1: What is our vision for CA's energy future (2050)?

15 minute Break (pick up lunch and return)

Step 2: Let's assess where we are now...

Step 3: What is our State strategy to facilitate the commercialization of H₂?

30 minute Break

How do we get there from here...*a plan for the next six months...*

3:00 Adjourn
